

# Wood-Polymer Composite (WPC) – Rewards & Features

Impact Resistant & less susceptible to scratches/abrasions - zero maintenance.

UV resistant exterior grade HDPE polymer - 100% impervious to corrosion/rusting/borer/termite/moisture/dust/algae/fungus etc.

Environmentally conscious - FSC certified recycled wood used and Co2 emissions under permissible limit at production facility

Chemically stable and doesn't react with acidic/industrial salts/saline water/oxidizing agents etc.

Self-extinguishing fire retardant - no carcinogenic gases emissions like lead, benzene, beryllium, asbestos, vinyl chloride, arsenic etc.

Simple installation and de-fabrication, light in weight, accesories procured locally - savings on transportation

9-10 years of warranty against application system. Optimized lead time for production.

Highly densified - tested and certified

- No warping, rotting, splinters etc.

Customizable dimensions

- Minimizing wastage cost during fabrication
